

K-LOVE radio is a nationally syndicated station transmitted over FM translators. Low power FM has the potential to displace K-LOVE signals. Such actions would be disastrous. K-LOVE radio has personally ministered to me and thousands of others with its uplifting message and positive song selection. It is safe radio content for all my kids, no matter the time of day. I cannot imagine another station playing family safe radio that would serve the public interest any better. I am proud to have my kids sing the verses to any of the KLOVE songs. What other radio station playing commercial-free 100% music can make that claim?
